Notes

- **Seeding:** Run `npm run db:seed` from `smartup-portal/` to create all accounts in PostgreSQL.
- **Passwords** are bcrypt-hashed (`rounds=12`) and stored in `portal_users.password_hash`.
- **Adding new users:** Log in as `Ayesha Khan` (HR) and use the HR dashboard to create accounts — a generated password is emailed automatically.
- **Owner bypass:** `smartuplearningventures@gmail.com` can log in to any role's dashboard regardless of route restrictions.
- **`academic` role** is a legacy alias — users with this role are redirected to `/academic-operator`.
